

"MAP" SERIES

NEW

REM2-R Wall Control Panel with Rotary Encoder

- New alternative model within the *REM* range of wall remote control panels for "MAP" processors.
- UP-DOWN level keys replaced by a rotary encoder.
- Similar features, size and shape of *REM2*:
4 key buttons plus an additional "ON" button, all of them configurable by the user.
- Compatible to *IR-02* infrared remote control.
- Compatible with *3cMAP* software, no update required.
- Proprietary RS485 remote controls. Several units can be daisy chained in order to control different areas.
- Source / Program / Preset Selection.
- Simple CAT5 wiring.

APPLICATION EXAMPLE
